

RollerWave3

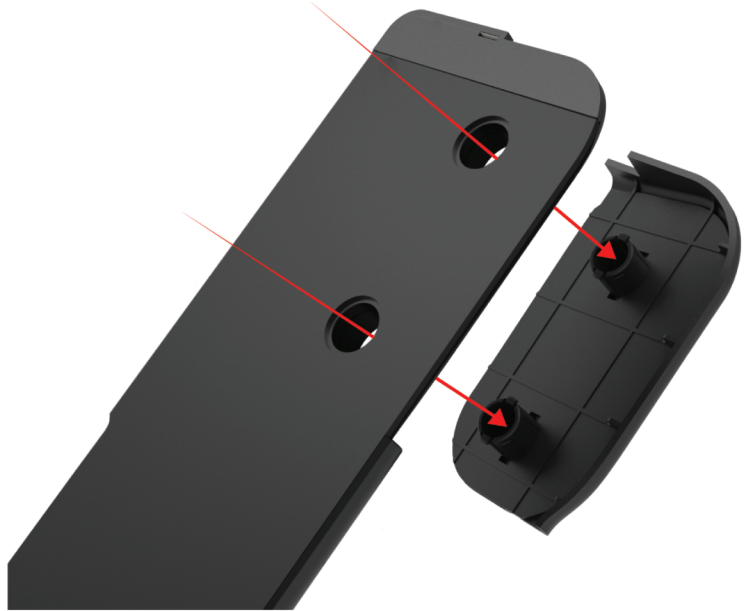

Wrist rest

Installation guide

Removing Wrist Rest

To remove the wrist rest from your RollerMouse Pro 3, simply apply pressure to the screws that are embedded into the underside of the wrist pads. We recommend using a small Phillips-Head screwdriver to press against each screw. It is not necessary to unscrew the screws.

Installing RollerWave3

To install the RollerWave3 to your RollerMouse Pro3, line up the pegs on the underside of the RollerWave3 with the corresponding holes on the RollerMouse Pro3.

Apply pressure until you hear the RollerWave3 click into place.
