

The Ultimate Sit-Stand Solution!

Sit-Stand Benefits:

- Improve your overall productivity throughout the day by alternating between both sitting and standing positions. This allows your body to stay in motion, allowing for a more focused and motivated work-day.
- Burn more calories, allowing you to maintain a healthy weight & ultimately decreasing your chances of disease caused by obesity. Standing while working burns a third more calories than sitting does.* For someone average size, that could account for more than 500 calories burned in a single day.
- Standing while working helps fight off the naturally occurring slumps and bouts of fatigue that often happen mid-morning or early afternoon.*
- Easily switch positions with just the push of a button, as ALL Ergotech sit-stand systems are electric powered.
- Improve posture, and avoid neck, hip and shoulder problems caused by incorrect Ergonomic positioning.

*Chris Adams, About.com Guide

“Ergotech’s new desktop riser, the One-Touch Free Stand, represents a step in the right direction for electric-powered risers. Its main competitor, the tankish Taskmate Executive, seems like an anachronistic behemoth next to the comparably sleek and customizable new riser.”

One-Touch free Stand

for PC or iMac®

Drop Down Keyboard model drops below desk-top

Desk-Top model lies flat on top of desk!

Ergotech's One-Touch Free Stand lies flat on top of your existing desk and requires NO desk or monitor mounting, installing in less than 10 minutes! Simply place the monitor stands on the work-surface, and you're ready to go!

Powered by an electric motor, the Free Stand easily adjusts to your desired height giving you the ability to sit-stand throughout your work day.

The One-Touch Free Stand is available in two models, the desk-top model and the drop down keyboard model. (See sample images of each below) Both come standard with the base unit and an electric motor, as well as an upper & lower work surface.

The base model holds up to two 27" monitors sitting on the top work-surface, with no mounting required! Optional monitor mounting for larger monitors is available as an upgrade.

Product Specs:

The One-Touch Free Stand comes standard with the base unit, an electric motor and an upper & lower work-surface.

Choose your lower work-surface:

- Drop Down Keyboard Tray 10" x28"
- Desk-Top work-surface 10" x28"

Choose your upper work-surface:

- Upper Work Surface 13" x28"
- Upper Work Surface 13" x36"

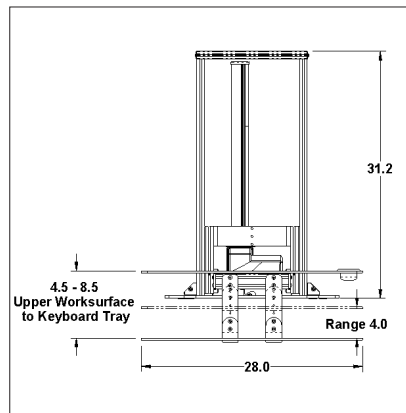

Total Unit Weight Capacity:

-Maximum: 100lbs

Monitor Size Capacity:

- Base Model: up to two 27" Monitors (with stands)
- Single Mounted Model: any size
- Dual Mounted Model: up to two 30" Monitors

Total Vertical Travel Range: 20"

One-Touch Ultra

for PC or iMac®

Ergotech's One-Touch Ultra is an innovative electric powered monitor mounting sit stand system that mounts directly to your desktop or wall! Compatible with both PC & Apple iMac® monitors, the One-Touch Ultra comes standard with both a lower and upper work-surface and your choice of desk mounting hardware.

Able to hold up to four monitors, the One-Touch Ultra blows the competition away with its unique features and outstanding performance. With the highest range of vertical travel (20") and the biggest work-surface on the market today, the One-Touch Ultra is sure to surpass all of your sit-stand system needs.

Enjoy the many benefits of sit-standing throughout your work day, and in no time you will be on your way to a healthier YOU.
