

# Q-doc 415

Work in alignment, also with heavy binders.

 BAKKER ELKHUIZEN

*Work Smart - Feel Good*

## Create an ergonomic workspace with a document holder.

With the Q-Doc 415 document holder you work in alignment with your keyboard and screen, so your neck will not bend as much because the documents are in front of you.

With the Q-Doc 415 your work will be more pleasant and efficient. Your body will be less taxed than if the documents were spread all over the desk.

To prevent neck rotation, documents have to be placed between the keyboard and display screen. A sloping work surface reduces flexion of the neck and thus increases work comfort.
